0. Introduction

The Code of Ethics is the document in which the ethical commitments and responsibilities in the conduct of business and entrepreneurial activities undertaken by the people who constitute the connective tissue of the company are encapsulated.

The main function of the Code of Ethics is to standardize individual behavior, to make the pursuit of the profit motive compatible and synergistic with respect for legality, making it possible to pursue the following purposes:

- Maintain and develop the relationship of trust with those categories of individuals, groups or institutions that are stakeholders in the company, including in particular customers, suppliers and business partners;
- Avoid unethical behavior, consisting of taking hostile attitudes towards the company, aimed at appropriating appropriate benefits, exploiting positions of strength.

The Code of Ethics also explicates the values to which all directors, employees and collaborators in various capacities of the company must conform, accepting responsibilities, arrangements, roles and rules of the violation of which, regardless of whether or not a corporate responsibility to third parties ensues from it, they assume personal responsibility to the company's interior and exterior.

These individuals are therefore required to know the content of the Code of Ethics and contribute to its implementation and dissemination of the principles developed therein.

The company also promotes the dissemination of its Code of Ethics to those with whom business relations are maintained, consistent with the manner and content of the relations.

The Board of Directors of SEA S.P.A. has therefore decided to adopt this Code of Ethics and Conduct (hereinafter referred to as the "Code of Ethics" or also the "Code"), which is intended to confirm and fix in a document the principles of fairness, loyalty, integrity and transparency of behavior, the way of operating and the conduct of relations both internally and with third parties.

The rules contained in the Code of Ethics supplement the behavior that the Recipients are required to observe by virtue of the laws, civil and criminal, in force in all the countries in which the entity operates, and the obligations provided for by collective bargaining.

Recipients of the Code of Ethics who violate its rules damage the relationship of trust with the Company and will be subject to the sanctions provided for.

Enforcement of the Code of Ethics is delegated to the Board of Directors, which makes use of the Supervisory Board established pursuant to Legislative Decree 231/2001 (hereinafter "Supervisory Board"). The company informs its internal and external activities with respect to the principles contained in this Code, in the belief that ethics in the conduct of business is to be pursued in conjunction with the success of the company.
